

NTE2005 VDSL 2 Centralised Filter

NTE2005 VDSL 2 Centralised Filter

The VDSL 2 Centralised Filter is a plug-in faceplate designed to replace the customer connection unit on the NTE 5, providing outlet ports for VDSL via RJ45 (RJ11 compatible) and BT telephone socket (401A). The unit also facilitates extension wiring via IDC (LSA style) terminals for both DSL and telephony.

The unit's DSL circuit is compatible with **both** ADSL and high speed VDSL 2 installations.

The DSL circuitry offers very good Signal to Noise Ratio's (SNR) and has proved particularly suited to areas where DSL connections are considered marginal.

Features

- ADSL filter performance compliant with SIN346
- VDSL2 filter performance compliant with SIN498
- Extension wiring for DSL and Telephony
- BT 1p white V0 UV rated plastic
- 30Mhz ADSL and VDSL 2 Compatible

Specifications

- Weight: 75g
- Colour: bright white
- Dimensions: 84 x 84 x 41mm
- Carton Quantity: 20
