

LANmark-OF Splicing Accessories with Heatshrink Protectors Snap-In Patch Panel

Description

Family Characteristics

- Family of patch panel accessories for termination of a cable when using fusion splicing techniques.
- The cassette protects the fusion splices and holds them in position.
- The splice cassette can retain up to 12 fusion splices.
- Four trays can be stacked inside the patch panels resulting in a maximum capacity of 48 fusion splices in a patch panel.
- Splicing with heat shrink protectors can be used for both tight buffer and loose tube cables, i.e. heat shrink protectors are compatible with both 250 and 900 um coated fibres.
- Splicing with heat shrink protectors can be used for both maxistrip and tight buffer pigtails.
- LANmark-OF Bend Limiting Tube (N890.145) can be used to split up fibres of loose tube cable into different splice cassettes.
- These splice cassettes can be installed in the LANmark-OF Snap-In Patch Panel (N441.203 and N441.204) and the LANmark-OF Zone Distribution Box (N521.630).
