

# Streamline cable ID and testing using a single identifier database

## Brady Express Labels Mobile App and Fluke Networks LinkWare™ Live

Import label data from Fluke Networks Linkware Live software to the Brady Express Labels Mobile App. Then print to a BMP®51, BMP®61 or BradyPrinter M611 Mobile Label Printer. Once labeling is complete, access the same Linkware Live software to complete cable testing using a Fluke Versiv testing device.

### With the Express Labels Mobile App you can also:

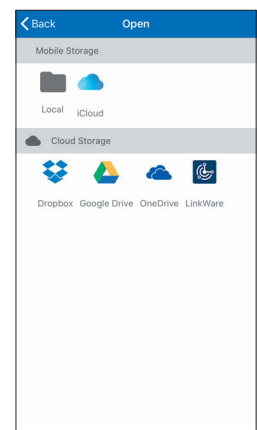

- Edit the font size, type style and justification
- Create numeric, alphabetic or alphanumeric label sequences
- See real-time printer details
- Import data from a variety of cloud-based services

### To use this integrated solution:

1. Download your set data from the LinkWare Live cloud using the Express Labels App.
2. View and edit your data to meet your specifications.
3. Connect your mobile device to your printer via Wi-Fi or Bluetooth.
4. Print the set labels on your BMP51, BMP61 or BradyPrinter M611 Mobile Label Printer.

### Complete labeling tasks with industry tested materials

Reduce downtime with our world-class label materials that are engineered to withstand the harshest industry environments for long-lasting clear identification. We produce a wide variety of custom or stock die-cut and continuous label materials that are specifically designed for use in cable marking and datacom applications.
