

# Ultima Active HDMI Cable 4K UHD 60Hz

Technical information

## Introduction

These active HDMI cables feature an active chipset to allow for longer cable lengths and less signal degradation. All support 4K 60Hz 4:4:4 resolutions at 18Gbps bandwidth and are more robust than conventional HDMI cables when required for longer lengths, or as part of a chain of cables being used as an overall solution. Particularly for use under floor boxes or behind wall plates where other cables will be plugged in in-front to complete the connection.

- 4K 60Hz image support up to 30m with active chipset
- Cables must be installed in correct direction, IN at source and OUT at TV
- Shielded cable for reduced interference
- PVC high quality, flexible, durable cable sheath
- HDCP 2.2 compliant with gold plated contacts
- All batches of cables tested to standard on delivery

## Part Codes / Performance

Part Codes	Length	Resolution	Refresh Rate	Bandwidth	Standard
823607	7.5Mtr	4K 4:4:4	60Hz	18Gbps	V2.0
821719	10Mtr	4K 4:4:4	60Hz	18Gbps	V2.0
817517	15Mtr	4K 4:4:4	60Hz	18Gbps	V2.0
817518	20Mtr	4K 4:4:4	60Hz	18Gbps	V2.0
818031	25Mtr	4K 4:4:4	60Hz	18Gbps	V2.0
818033	30Mtr	4K 4:4:4	60Hz	18Gbps	V2.0
