

## START & INTER Connecting leads

- .13A plug to female GST18 mains leads
- .Male to female Wieland interconnecting leads
- .Re-wireable Wieland connectors
- .Wieland coupler blocks

All P-PACK desktop and under desk units need our Start leads to power up. This method is used to allow for multi length cables to keep the work space better managed, Interconnecting leads are used to daisy chain between desks when using Power Pack or desktops connected using coupler blocks.
