Fibre Cable Support Kit

Gripple's Fibre Cable Support Kits are a specifically designed, innovative method of standing-off and supporting fibre optic cable runs – massively reducing the time required working at height for all fibre optic cable installs. The kits can be supplied as pre-cut lengths, designed to minimise the amount of cutting required on-site, or as a bulk option which can be cut to suitable lengths as and when they are necessary.

FEATURES / BENEFITS

- Considerable time and labour savings mean that the time spent working at height is vastly reduced
- 'Push-fit' system meaning that very little training is required and health & safety risks are reduced.
- Available in ready-to-use, pre-cut lengths which minimise the amount of cutting required on-site
- All materials have been successfully tested in harsh, outdoor environments
- The D3 Lockable requires a release key for release which eliminates the risk of tampering
- Standing fibre cables off of the wall prevents damaged fibres and allows legacy cables to be avoided
