About HellermannTyton

Better Technology through Innovation

HellermannTyton is an established and innovative leader in the provision of global network infrastructure solutions, offering a broad range of quality, high performance structured cabling products. Their extensive product range includes a number of different options for Category 6A, Category 6 and Category 5e systems as well as their world leading pre-terminated RapidNet system.

Why choose HellermannTyton?

- The UK's largest manufacturer producing over three million system points annually.
- ISO 9001:2008 quality certification and ISO 14001:2004 environmental management accreditation.
- Open, responsive and accessible personnel at all levels.
- BICSI registered training available (up to 6 credits for Cat 5e and Cat 6 Installer Course).
- On-site design and technical facilities
- Wide range of reference sites across major industries including finance, education, government and health.
- Passionate about putting their customers first

Connectivity Training Courses and System Warranty

HellermannTyton offer a range of BICSI registered training courses, held in specially equipped training rooms at their Northampton manufacturing facility.

There are currently three LAN structured cabling courses to choose from:

- 1 day Category 6A course
- 2 day Fibre course
- 1 day Category 6/Category 5e Practitioners course (Carries 6 BICSI credits, CEC's)

On completion of the training courses, attending installers are qualified as approved HellermannTyton installers and are able to offer the 25 year warranty on their network installations.

Easy Product Navigation

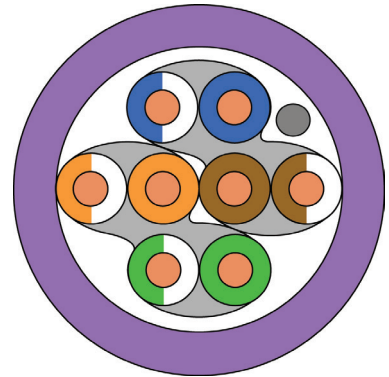

To help you find the right products for your network infrastructure we have made identification easier by using the following category labelling system

CATEGORY 6A	For Category 6A products look for this symbol	
CATEGORY 6	For Category 6 products look for this symbol	
CATEGORY 5e	For Category 5e products look for this symbol	

HellermannTyton Cat6a U/FTP Data Cable

Category 6A Cable with a U/FTP construction. Individual pair screening minimises the risk of alien crosstalk

- Exceeds Category 6A performance standards
- Uncompromised support for 10G Ethernet
- Metre marked for accurate measuring
- Supplied on 500m drums

Item	Man. Code	Description	Category	Type	Sheath	No of Pairs	CPR Euroclass	NVP Rating	Outer Dia	Colour	UoM	Price
805536	CA159	Solid Core Cable	Cat6a	U/FTP	LSZH	4 Pair	Eca	66%	7.2mm	Violet	Reel Of 500mtr	£271.11

HellermannTyton Modular Shielded Patch Panels

Modular shielded patch panels for Deca10 Cat6A keystone jacks

- Up to 24 Deca10 Cat6A shielded jacks in 1U
- Dual labelling fields
- 360 degree shielding eliminates alien crosstalk
- Supplied with Rack Snaps
- Integral earthing plate
- Integral rear cable management

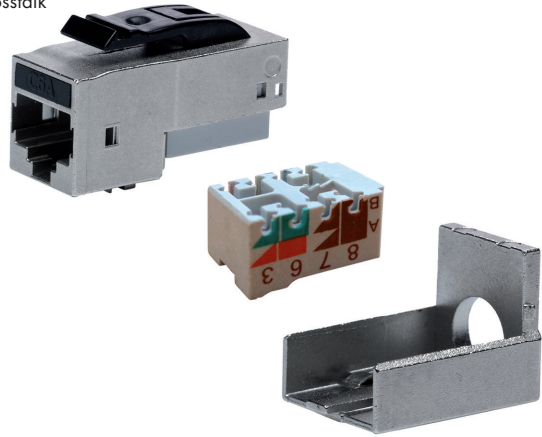

Item	Man. Code	Description	Category	Type	Ports	Jack Type	Height	Width	Colour	UoM	Price
805624	PP24G6A-PA1URS-FD.XX	Modular Patch Panel	Unloaded	Shielded	24Port	Deca10	1U	19"	Black	Each	£31.30

HellermannTyton Deca10 Jack

Deca10 Cat6A keystone jacks

- Utilise HellermannTyton's patented 10-pin technology
- Exceed Cat6A performance requirements
- Quality die cast body
- 360 degree shielding ensures all round protection from alien crosstalk
- Single action hand tool termination
- No punchdown tool required
- For use in modular patch panels and angled shutters

Item	Man. Code	Description	Category	Type	Colour	UoM	Price
805625	KSJ08SC6A-12-GY	Deca10 Keystone Jack	Cat6a	Shielded	Silver	Pack Of 12	£49.92
805626	KSJ08SC6A-GY	Deca10 Keystone Jack	Cat6a	Shielded	Silver	Each	£4.31

HellermannTyton Cat6a Shielded Patch Leads

Category 6A shielded patch leads for 10G networks

- Exceed Cat6A performance requirements
- Shielding eliminates alien crosstalk
- Low profile plug with integral strain relief boot
- Factory test results supplied
- LSZH Sheath
- Non-standard lengths available on request

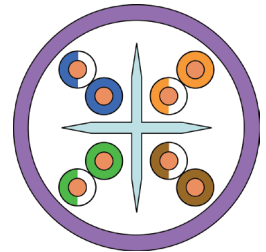

Item	Man. Code	Description	Category	Type	Sheath	Boot	Colour	Length	UoM	Price
805635	RJ45C6AGY-1.0M	Patch Lead	Cat6a	S/FTP	LSZH	Moulded Boot	Grey	1Mtr	Each	£5.09

805637	RJ45C6AGY-3.0M	Patch Lead	Cat6a	S/FTP	LSZH	Moulded Boot	Grey	3Mtr	Each	£6.85
805848	RJ45C6AGY-5.0M	Patch Lead	Cat6a	S/FTP	LSZH	Moulded Boot	Grey	5Mtr	Each	£8.61
805638	RJ45C6AGY-10.0M	Patch Lead	Cat6a	S/FTP	LSZH	Moulded Boot	Grey	10Mtr	Each	£13.01

HellermannTyton Cat6 U/UTP Data Cable

Category 6 U/UTP cables

- Supplied in boxes of 305m
- Exceed Cat6 performance standards
- Length marked every metre

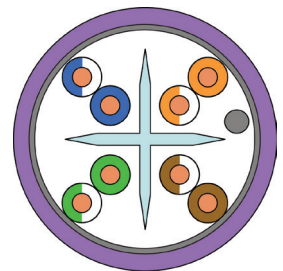

Item	Man. Code	Description	Category	Type	Sheath	No of Pairs	CPR Euroclass	NVP Rating	Outer Dia	Colour	UoM	Price
800454	CA076	Solid	Cat6	U/UTP	LSZH	4 Pair	Eca	66%	6.2mm	Violet	Box Of 305mtr	£88.69

HellermannTyton Cat6 F/UTP Data Cables

Category 6 F/UTP cables

- Exceeds Category 6 performance standards
- Foil shielding for protection from EMI
- Metre marked for accurate measuring
- Supplied on a 500m drum

Item	Man. Code	Description	Category	Type	Sheath	No of Pairs	CPR Euroclass	NVP Rating	Outer Dia	Colour	UoM	Price
805613	CA120	Solid Core Cable	Cat6	F/UTP	LSZH	4 Pair	Eca	66%	6mm	Violet	Reel Of 500mtr	£233.40

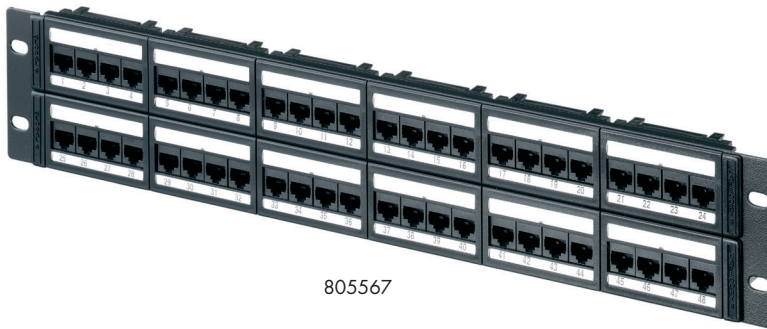

HellermannTyton Global Cat6 Patch Panels

Cat6 rear punch panels with 4 port modules

- Exceed Cat6 performance requirements
- 568A & 568B wiring options
- Double labelling fields with magnifying covers
- Supplied with Rack Snap mounting fixings

Cat5e rear punch patch panels with individual, replaceable ports

- Exceed Cat5e performance requirements
- Aluminium rear cable management
- 568A or 568B wiring options
- Slide-in labelling system
- Supplied with Rack Snap mounting fixings as standard
- Backwards compatible to Cat5 and voice

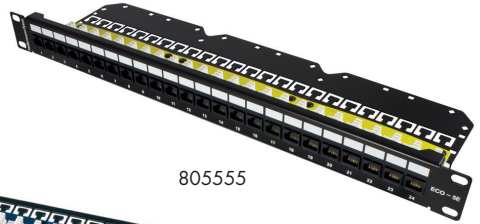

5e

Item	Man. Code	Description	Category	Ports	Pairs	Height	Width	Colour	UoM	Price
805558	1/2408IDCHDC5ECM/BK	Alpha Snap Patch Panel	Cat5e	Unshielded	24Port	1U	19"	Black	Each	£73.34

HellermannTyton Cat5e Assembled Outlets

Fully assembled faceplate with four Cat5e outlets

- Standard UK single gang faceplate
- High port density
- 568A or 568B wiring options
- Dual label fields with magnifying lens
- Labelling software available
- Comes with rear cable management clip
- Incorporates a 4 port snap-in PCB assembly
- Backward compatible with Cat5 and voice

Item	Man. Code	Description	Category	Size	Type	Height	Width	Depth	Colour	UoM	Price

HellermannTyton POD-B Pod Boxes

Unloaded pod boxes for under-floor or desk top applications

- Plastic construction
- Designed to pass through standard floor grommets
- Screw fixing points
- Suitable for Cat5e, Cat6 and Cat6A applications
- Multiple protected labelling fields
- Accept LJ6C modules and keystone shutters
- Angled shutters required for Cat6A jacks
- Secure mounting for flexible conduit

HellermannTyton Coolport Port Extenders

The Coolport is designed to provide an instant method for adding more devices to a single cable port. Ideal in emergency situations where not enough network outlets are available or when cost or disruption caused by installing additional cabling is prohibitive.

- Plug and Play Installation
- Enables quick equipment deployment in disaster recovery situations
- Provides simple and effective additional capacity
- Sleek, modern design
- Coolports are supplied singularly or in pairs as a kit including patch leads
- A Coolport is required at both the work area and patch panel

805849

805856	APA-COVER1URS	Angled Panel Cover & 1U Flat Blanking Plate	Rack Snaps	1U	19"	Black	Each	£26.18

HellermannTyton Angled Panel Rear Cable Management Bars

Rear cable management bars for use with HellermannTyton's range of angled patch panels

- Provides cable strain relief
- Will manage up to 48 cables

Item	Man. Code	Description	Height	Width	Colour	UoM	Price
805854	APARCM1U	Angled Panel Rear Cable Manager	1U	19"	Black	Each	£19.93

HellermannTyton Cable Management Panels - Vertical Ring

Front cable management bar with 5 rings to hold & support the cables in position

Item	Man. Code	Description	No of Rings	Ring Direction	Height	Depth	Colour	UoM	Price
805614	1CTV-P/BK	Cable Manager	5 Ring	Vertical	1U	75mm	Black	Each	£2.47

HellermannTyton Rack Snaps

Rack Snap 19 inch mounting hardware

- Reduce time taken to mount equipment in 19 inch racks
- Replace conventional cage nuts
- Simply insert in to the front of the 19 inch uprights
- Supplied with M5 fixing screws and washers

Item	Man. Code	Description	Type	UoM	Price
808052	RS100-BK	Rack Snaps	3-way	Pack Of 100	£59.65

What is RapidNet?

RapidNet is HellermannTyton's fully patented pre-terminated, pre-tested modular cabling system, eliminating the need for on-site terminations and reducing installation times significantly. All terminations are housed in the RapidNet cassette, ensuring complete protection and strain relief of the cables.

Why Choose RapidNet?

1. RapidNet provides choice and flexibility to the installer and end user by offering an extensive range of connectivity options in both fibre and copper formats, based on a common cassette delivering consistent performance, breadth of range and maximum flexibility.
2. Reduce installation times by up to 95%
3. Minimal on-site testing is required once installed because it's pre-tested
4. Manufactured at HellermannTyton's purpose built facility in Northampton, UK
5. Can support high speed 10G networks and beyond
6. High port densities can be achieved using RapidNet fibre, with MTP connectors providing up to 144 fibres per cassette or up to 576 fibres in 1U of rack space
7. Less on-site cabling and packaging waste

Copper RapidNet

HellermannTyton's RapidNet pre-terminated copper systems offer options and flexibility to any network cabling infrastructure project. Available in Category 6A, Category 6 and Category 5e, HellermannTyton are able to supply pre-terminated copper RapidNet in 12-port, 6-port and 4-port cassettes.

Cassette to Cassette

The cassette to cassette pre-terminated system is available in 12-port, 6-port and 4-port variations. The cassette to cassette option is typically used in a data centre or comms room application where rack to rack or cabinet to cabinet connectivity is required. Using the 12-port cassette it is possible to use a split cassette option using two 6-port cassettes on the other end providing additional flexibility in the data cabinet.

Cassette to Bare End

The cassette to bare end provides flexibility during installation. This option is used in projects where space between rooms is limited or lengths are uncertain at the planning stage. The bare end can then be terminated on site to a range of outlets and panels available from HellermannTyton.

Cassette to Pod

The cassette to pod option is available in 12-port, 6-port (Cat6 and Cat5e only) and 4 port variations. Each pod houses up to 6 RJ45 outlets and can snap into a floor box or used as a consolidation point beneath raised floors or in ceiling voids. In some applications it is possible to use a split-pod option provide more flexibility at the work area end.

Cassette to Keystone Jack

The cassette to keystone jack is available in 6-port and 4-port options and gives the installer or end user added flexibility at the desk or 'work area' end. The keystone jack can be easily clipped into a selection of modules that can be fitted into floor boxes or wall mounted face plates.

Cassette to RJ45 Plug

The cassette to RJ45 plug option is available in 12-port, 6-port (Cat6 and Cat5e only) and 4-port variations. This RapidNet option has been designed for cabinet to active equipment installations where the use of a full cross-connect solution reduces the risk of damage to the ports on expensive active equipment.

Fibre RapidNet

HellermannTyton's RapidNet pre-terminated fibre range offers the same flexibility as the copper products but has the added benefit of providing high density connectivity and performance over greater distances.

The RapidNet pre-terminated fibre system is available as standard in single mode (OS1) and multimode (OM3 and OM4) formats. The RapidNet fibre cassette offers a choice in connectivity options including LC, SC and MTP in cassette to cassette, cassette to fan out, or cassette with MTP connectors on the rear.

MTP Cassette to MTP Cassette

The MTP cassette to cassette option is currently available in 4 variants. MTP enables users to install a high density fibre network without demanding too much rack space. Using the 24 Core MTP 12-port cassette, it is possible to achieve 1152 fibres in 1U of rack space.

MTP Cassette to MTP Fan Out

The MTP cassette to fan out option has been designed to offer flexible, high density patching/connectivity. The MTP cassette presentation will be the same as above and the fibre fan out option will typically be either 6 or 12 MTP connectors or for high density patching a 72 LC connector fan out is available.

LC Cassette to LC Cassette

The pre-terminated fibre RapidNet LC cassette to cassette is available with either 24 LC ports (using 12 LC duplex adapters) or 12 LC ports (using 6 LC duplex adapters). The 24 port cassette provides up to 96 fibres in 1U of rack space whereas the 12 port cassette can achieve up to 48 ports in 1U. The LC cassette to cassette solution is more commonly used in data centre applications or large comms rooms.

LC Cassette to Fan Out

The LC cassette to fan out uses either a 24 or 12 port LC cassette and presents the same amount of LC connectors in a fan out arrangement that is designed for fibre patching or connectivity into active equipment and hardware. The fan outs are also available with SC connectors providing flexibility when patching into equipment that uses the SC format.

SC Cassette to Cassette

The pre-terminated fibre RapidNet SC cassette to cassette is supplied with 12 SC ports (using 6 SC duplex adapters) providing a maximum of 48 SC ports in 1U of rack space. As with the LC cassette to cassette solution, the SC cassette to cassette version is more commonly used in data centre application or large comms rooms.

SC Cassette to Fan Out

The SC cassette to fan out uses the 12 port SC cassette and presents the same amount of SC connectors in a fan out arrangement that is designed for fibre patching or connectivity into active equipment and hardware.

Cassette with Rear MTP Connector

The RapidNet cassette with rear MTP connectivity is available in a number of options. The 24 port LC cassette is available with 1 or 2 MTP ports on the rear of the cassette whereas the 12 port LC and SC cassettes are supplied with 1 MTP port on the rear. This option is ideal for installations in areas of limited space.

MTP Back Bone Cable

The MTP Back-Bone cable is pre-terminated and pre-tested ensuring the highest performance. The MTP Back-Bone cable can be used for high density patching between two MTP ports and is particularly suited to applications where space is limited.

MTP Connector to Fan Out

The MTP to LC fan out is designed to provide a high density inter-connect which uses minimum space making it an ideal solution for patching active hardware in data centres where space is at a premium.
